

Features of the Project:

- **Calculates TSP** from given set of locations.
- User can select **any starting point** for his/her TSP path.
- Shows TSP path based on **travel mode** selected by user.
- **Recalculate TSP** at any time demanded, just **by saying "Recalculate my TSP or Recalculate"** to the app.
- **Save and load** user's TSP data.
- **Voice interactive** app that can reduce user attention to cell phone while driving or bicycling.
- Clicking the user marker shows all **summary** of user's current history (like; Distance covered, Time spent and soon).
- **Recalculates TSP path automatically** once the user visits any wrong target location.
